Hello,

My name is Ayush Sharma, and I am a rising senior at the Georgia Institute of Technology majoring in Computer Science with concentrations in Artificial Intelligence and Human-Computer Interaction.

My past internships listed on my resume provided me a solid understanding of the requirements for the internship position.

During my software engineering internship at Northrop Grumman, I was an acting liaison to the Centers for Disease Control and Prevention (CDC) where I had the pleasure of working on numerous projects regarding the Covid-19 pandemic.

Transitioning from defense to the finance sector, I was employed as a product management intern in the U.S. Bank Investment Management Group (IMG). One of my primary responsibilities was to lead technical development of Azure CosmosDB provisioning for an advanced cybersecurity application to help prevent financial fraudulent activity on U.S. Bancorp Investment Management Group (IMG) clientele portfolios.

When I went back to Georgia Tech to continue my studies, I worked at the Georgia Tech Research Institute as an undergraduate research assistant where I work with other undergraduate and graduate students to develop a radio prototype to analyze geospatial signals from the Bobby Dodd football stadium.

During the summer of 2022, I had the opportunity to intern with PricewaterhouseCoopers (PwC) Cloud & Digital practice. I was placed on 2 separate projects – one with Goldman Sachs Consumer & Investment Management Operations and another with Walmart e-commerce. In each of these client engagements, I performed at an exceptional level which led to me receiving high praise from my superiors and colleagues.

In addition to internships, I am an avid soccer player as a player of the Georgia Tech soccer team. Additionally, I am a member of the Georgia Tech CEISMC Student Program, Undergraduate Consulting, and Product Management Club. These extracurriculars fortified me as an individual and honed my skills personally and professionally.

Thank you for your time and consideration. I look forward to hearing from you to continue the candidate selection process.

Sincerely,
Ayush Sharma
